**Model KB535BL**

**FCC STATEMENT**
KB535BL

This device complies with part 15 of FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction guide, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult a service representative for help.

Properly shielded and grounded cables and connectors must be used in order to comply with FCC emission limits. Micro Innovations is not responsible for any radio or television interference caused by using other than recommended cables and connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate the equipment.

**Some experts believe that the use of any keyboard may cause serious injury to hands, arms, neck, or back. If you feel any pain, numbness, or weakness in these areas seek help from a qualified health professional immediately.**

TO REDUCE THE RISKS OF SUCH INJURIES FOLLOW THESE PRECAUTIONS

- Take frequent short breaks
- Vary your tasks throughout the day
- Keep your shoulders relaxed with your elbows at your side
- Position you keyboard and mouse so you do not have to reach for them
- Adjust your chair so your wrists are straight
- Avoid resting your wrists on sharp desk edges

# Welcome

Congratulations on the purchase of your new Internet Pro Keyboard. Its advanced design and enhanced performance features makes the device simple to install and easy to use. The following information in the manual will help you install, use, and maintain your new Keyboard.

The device is compatible with IBM® or compatible PCs with an available USB port. It is supported by Windows® 2000, XP and Vista™.

## Features and Benefits

16 programmable hot keys will maximize the way you control your PC. Conveniently launch your favorite applications, digital music and the Internet with a touch of one button.

Conveniently placed multimedia controls offer easy access to most common media related commands.

Protective material located underneath the keycaps guard your keyboard from liquid spills for years of use.

## Package Contents

- Internet Keyboard Pro (USB)
- Installation CD with User's Manual
- Quick Installation Guide
- Warranty Information

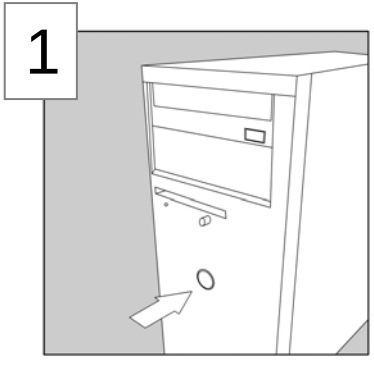
## Installation Procedures

Important – It is required that you turn on your PC before beginning the installation procedures.

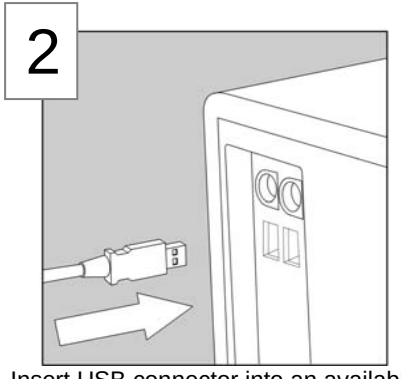
**Step 1** - Turn on your PC.

**Step 2** - Connect the USB connector to an available USB port on your PC. Your PC will determine the correct settings to operate this device.

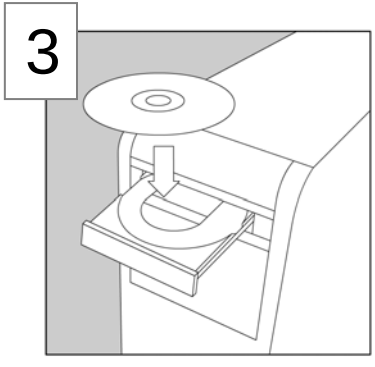
**Step 3** - Install the software CD. *Note: some operating systems need to be restarted in order for the program to function properly. It is recommended to restart your PC after installing this software program.*



Turn on PC



Insert USB connector into an available USB port

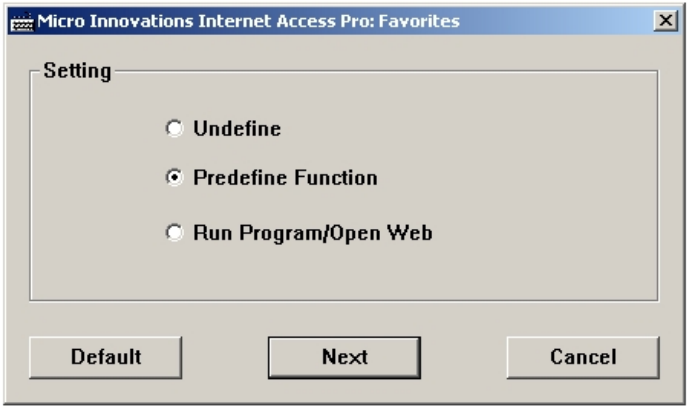


Install software CD

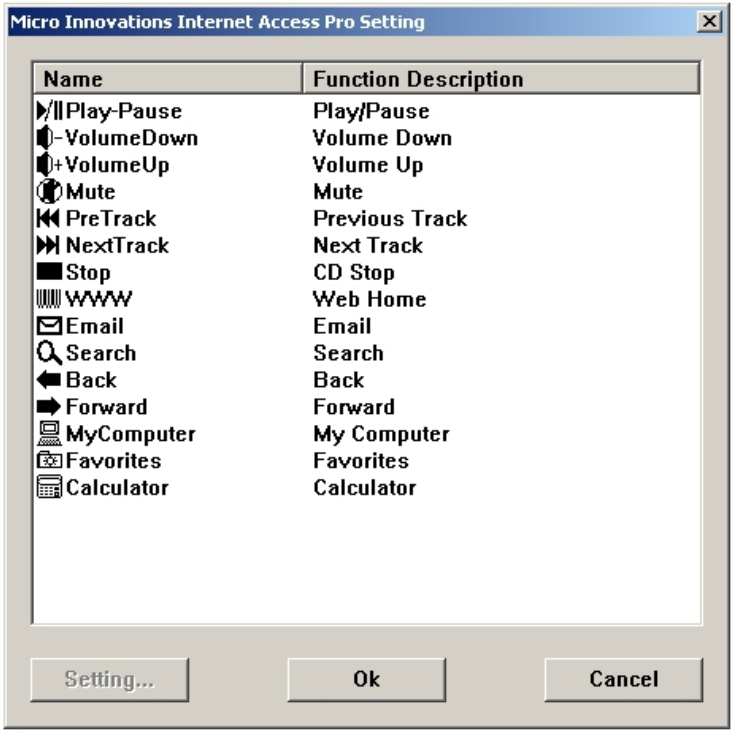
## Programmable Hot Key Settings

To enable the programmable hot key functions, click Start⇒ Programs⇒ Micro Innovations⇒ Internet Keyboard Pro.

The following icon will appear in the lower right-hand corner of your system tray. To launch the keyboard settings interface (Fig.1), click the keyboard icon. Highlight the name of the key and select “Setting…” The following window will appear:



By default, the programmable hot keys are designed to perform specific operations that are labeled as “Predefine Function.” You can disable their functionality by selecting “Undefine”. To assign a program or website, choose “Run Program/Open Web” and click “Next”. Type in the name of the function and choose program or website address. Click “Ok” to finish.



(Fig.1)
